

Description

Ströer©Uwe Merkel

DOOH City Board are large digital screens on main roads and traffic junctions. They impress with their elevated position in a large landscape format and convince with luminous LED technology, which is why they are unmissable by day and night. Your target group is open to your advertising in the average waiting situation (e.g. at traffic lights) and will take notice of your messages.

Operating hours: Monday to Sunday, 6:00 to 22:00/23:00/24:00 o'clock (depending on city)

Possible ad duration between 10 seconds and 30 seconds

Notes

Possible degree of movement for DOOH City Board: still image, cinemagram and animation (depending on the city). Full videos are not permitted

Specifications

Spot length

- Please refer to the order confirmation for the spot length
- No title slates or blank frames
- ATTENTION: exact booked spot length, i.e. at 10 seconds = 10 s 00 ms (there must not be milliseconds more or less)

Resolution

- 672 x 432 pixels, sRGB
- 576 x 408 pixels, sRGB
- The resolution and the degree of movement depend on the city. Please observe the format specifications for each city.

Degree of movement

- No restrictions
- Please note the degree of movement per city (see **table Format specifications & degree of movement per city**) as well as the notes on the design of cinemagrams and animations (see **notes on creative design**)

Design guidelines & specifications

Vorgaben zur Gestaltung von Werbemitteln

- IMPORTANT! Still image, cinemagram & animation - no videos!
- For further information, please refer to the table below ("Format specifications").

- The measured font height of any depicted font must be at least 30 pixels from the baseline (an exception is made in the font height for legally binding notices: here it is exactly 7 pixels)
- Images that can be confused with traffic lights or traffic signs are not permitted
- Please also note that traffic light colours (signal red/orange/green) may not be used on a large scale in Cologne.

Notes on creative design

Cinemagram

Cinemagrams are living images in which selected areas of the image move: a combination of still image and video elements. The moving details within the image are emphasized and make the image an unforgettable highlight.

- No text animations
- No fading in and out of layout elements
- Slow and discreet movements
- Only a small section of the motif may be animated

Animation

Animations are living images in which the image moves across the entire surface.

- Text animation
- Fade in and fade out of layout elements
- Faster movements
- Full-screen animation
- Note: A maximum of 4 large-area fade-ins (fade time min. 0.3 seconds) and/or a maximum of 2 full-area (soft) fade-outs (transition time min. 0.4 seconds) are permitted.
- Here you can find more information: [DOOH Degree of movement.pptx](#)

Still image

The layout is a pure still image without any movement.

- No text animations
- No fading in and out of layout elements

Recommendation for DOOH Creation

- Put key information (e.g. headline, URL, logo) as large as possible
- Limit yourself to a few, essential contents for optimal perception
- Use a clear visual language and little text (70% image / 30% text)
- A URL is best remembered as contact information

Visualization of a motif at different distances

- The fonts in this motif are 47.5 pixels or 30 pixels (minimum font height) high.
- 47.5 pixels are easily readable even from a distance of 75 meters and thus achieve the maximum advertising effect.
- The minimum font height of 30 pixels is barely legible from a distance of 75 meters.
- We recommend making the font and image as large as possible. A large message leads to an optimal advertising impact!

General instructions for DOOH that must be followed

- Content should be receivable in the booked time
- Content must comply with youth protection guidelines
- Spots must be created exactly in the resolution of the booked advertising medium
- Spot lengths must correspond exactly to the booked time
- Note on the **AI labeling requirement**: As of August 2, 2026, the AI labeling requirements under Article 50 of the AI Regulation will take effect. As a client, please verify whether your AI-generated or AI-modified advertising materials are subject to the labeling requirement under Article 50 of the EU AI Act. The responsibility for compliance with the labeling requirement lies with you as the creator.
