Notes on creative design

Animation

Animations are living images in which the image moves across the entire surface.

- Text animation
- Fade in and fade out of layout elements
- Faster movements
- Full-screen animation
- Note: A maximum of 4 large-area fade-ins (fade time min. 0.3 seconds) and/or a maximum of 2 full-area (soft) fade-outs (transition time min. 0.4 seconds) are permitted.
- Here you can find more information: [DOOH Degree of movement.pptx](#)

Cinemagram

Cinemagrams are living images in which selected areas of the image move: a combination of still image and video elements. The moving details within the image are emphasized and make the image an unforgettable highlight.

- No text animations
- No fading in and out of layout elements
- Slow and discreet movements
- Only a small section of the motif may be animated

Still image

The layout is a pure still image without any movement.

- No text animations
- No fading in and out of layout elements

Recommendation for DOOH Creation

- Put key information (e.g. headline, URL, logo) as large as possible
- Limit yourself to a few, essential contents for optimal perception
- Use a clear visual language and little text (70 % image / 30 % text)
- A URL is best remembered as contact information

General instructions for DOOH that must be followed

- Content should be receivable in the booked time
- Content must comply with youth protection guidelines
- Spots must be created exactly in the resolution of the booked advertising medium
- Spot lengths must correspond exactly to the booked time
